Orobable New Infantry Division, Shih-ho-tzu MCGORDINATES GELOGRAPHIC COORDINATES See Table 1 See Table 1 None None MA SERVERICE See Table 1 See Table 1 None None MA STATEMENT None None None MA STATEMENT None None None MEGATION GATE Frequency NA None None 1. Facilities for a probable new infantry division in Sinkiang Military Region, China, have been identified on KEYHOLE photography of July-August 1973 (Figure 1). The new facilities are approximately 50 nautical miles southwest of the city of Shih-ho-tzu and house the third infantry division identified in Sinkiang Military Region since October 1972. The Shih-ho-tzu area straddles a natural access route leading into China from the Soviet Union and is approximately midway between the regional capital of Wu-lu-mu-chi and the Sino-Soviet border. 2. This probable new division appears to be housed in three regimental-size installations: Yuch-ya-tai Barracks Area SW, Meiyo Barracks Area NNW, and Mei-yo Barracks Area West. Figures 24-show portions of these installations. Although parts of these installations were present in July 1973, when newly constructed military training facilities and ground order of battle were identified. Between October 1972 and July 1973, practice grenade ranges, small-arms firing ranges, obstacle courses, and/or arthetic fields were built at all three installations. 3. In addition, elements of at least two artillery units were identified in the area of the probable new division in July 1973. Six field guns were at Mei-yo Barracks Area NNW and six more field guns, six possible field guns, and ten howizzers were at two rest stops along the main route into the Shih-ho-tzu area. 4. Table 1 lists all installations associated with the three infantry divisional areas identified since October 1972.
